What happens after a referral has been made?

Step 8:

What if the LHD wants additional information?

Step 1: Accessing HealthLink SmartForms (eReferrals)

There are three ways to access the forms within your Shexie software...

A

From Appointments

In the appointment calendar, right click on the patient and then select **HealthLink Form**

or

B

From Patient Functions

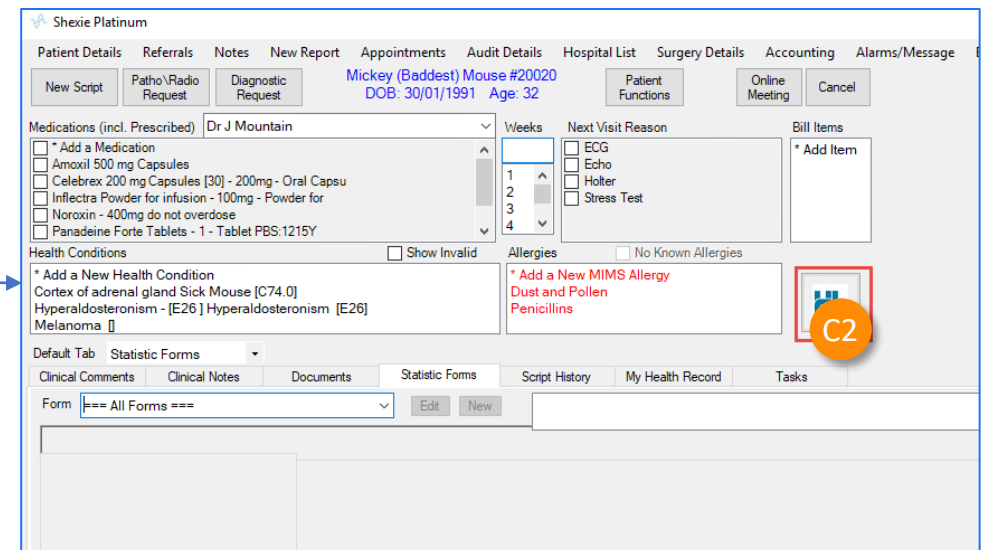

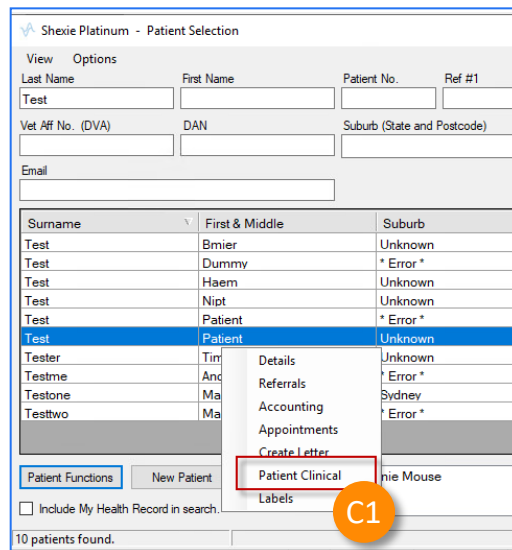

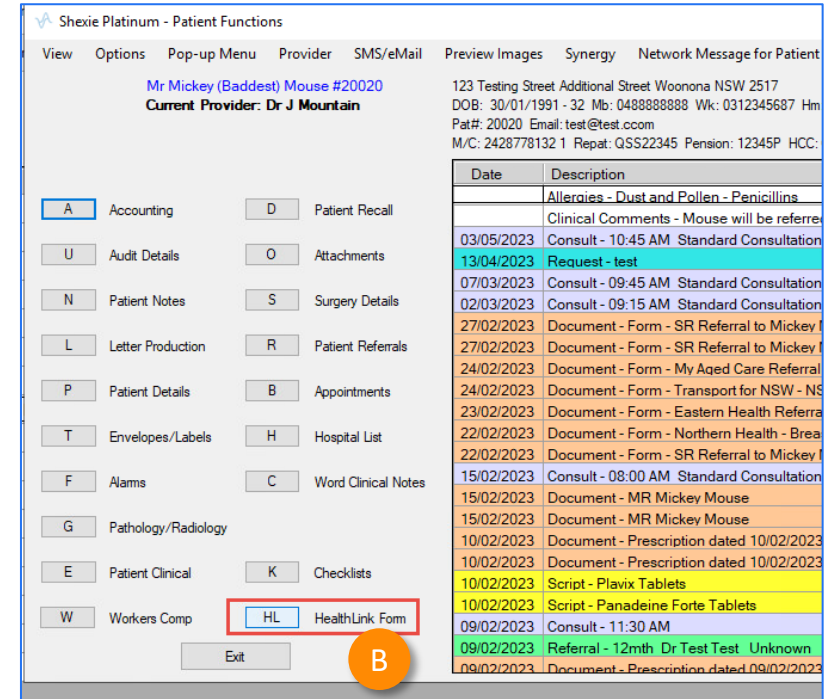

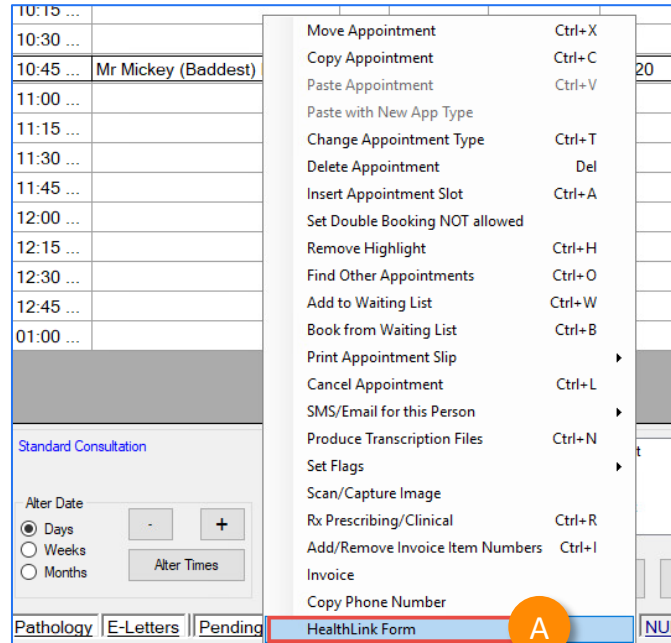

Open and search for a patient via Patient Search. Once you are in the patient record click on **HL – HealthLink Form**.

or

C

From Patient Clinical

From the Patient search screen, after you have located the patient, click on the patient's name, select **Patient Clinical** and then click on the **HL icon**.

Step 1:

Accessing HealthLink SmartForms (eReferrals)

If the patient has not had a HealthLink smartform created previously, when you click on the **HL** icon, you will be taken directly to the HealthLink home page (skip to next page).

- D** If the patient has any previously created smartforms, you will be presented with a pop-up window where you can **access a previously parked/saved form,**
- E** or **create a new form** for that patient.

The screenshot shows the Shexie Platinum - HealthLink User interface. The main window displays a list of smartforms with columns for Time, Appointment, Created Date, Patient, Type, Subject, Description, Provider, User, Status, and Message ID. The first two rows are highlighted in blue. A red box highlights the 'New' button in the top right corner of the window, with an orange circle labeled 'E' pointing to it. Another orange circle labeled 'D' points to the first row of the list.

- A Here you'll find a list of available services to refer patients.
- B Within the **Referred Services** section, Click on the link named **Health Outpatient Referrals -** followed by the name of the **LHD** you wish to send to.

(e.g. *Health Outpatient Referrals – Western Sydney LHD*)

To launch the smart form, **NSW Health Outpatient Referrals** require you to then:

- C • **select a specific service** and
- D • **facility** (only if there's multiple facilities for that service)
